---

What should I include tomorrow or should I leave ITC out? Thanks

I received a call from the EOC and they're trying to put out another spot report. I told them that they can use the information we distributed on WebEOC this am until you were available after 1 pm CST. I wasn't comfortable commenting on information that I wasn't provided by the field or through reporting on the incident (you guys). I'm sure they'll be looking for information later today.

I just saw Petersen and he said there was an issue with the update I received from Steve this am and was already included in the Ops Report. Please let me know if I'm supposed to continue to include updates from Steve in the Ops report or should discontinue updates on ITC. I'm totally fine either way.

Thanks
